

UNIVERSAL, COSMIC AND INTERGALACTIC CONSTITUTION

Naturalist Manifest
(or non manifest)

“All responsible of All in front of All”

“Liberty fraternity solidarity indivisibility “

Statement of the “problem”

Human kind is nowadays facing a crisis never met yet: environmental, political, psychic, climatic... global.

Only two possibilities prevail in front of such crisis already met by many species in Earth history: to adapt to the change or to be destroyed by the change. Human kind is today in front of this Choice. The Crisis is rooted in human egocentrism, fundamental structure of the dying old human system (cogito ergo sum) that has to be rebalanced.

The alternative to anthropocentrism is ecocentrism: Nature and its Laws in the center (or as a foundation) of any human institutional structure: social, political, educational, health and care, religious, spiritual, scientific, recreative, agriculture and fishery, industrial sector, services/tertiary sector, army and defense, economic and financial, justice and court, Law and Governments, diplomacy, taxes, art and leisure, entertainments and other senses pleasures, etc.(Or the absence of center, as interdependence of each element is characteristic of the law of Nature).

Replacing EGO by ECO requests a legitimization of Nature, as characterized par the Law of One or interdependence of all its Element: Nature can't be divided and human is just a part of it (the ignorance of universal laws of Nature is the source of egocentric human dysfunctional system).

METHOD

Reajustement Method: the (Natural) Law of One human spirit reappropriation

Not a philosophy or a religion, the method is very simple and various technics are easily available nowadays, from meditation to physics, etc., as they definitely follow the same goal and arrive at the same conclusions (as Prof. M. Sobottkha shows it in “A Course in Consciousness “).

But generally, founded on a minimalist but universal Ethic (abstaining of killing, stealing, lying, intoxicants and sexual misconducts), the technic is made of 5 steps:

1. Control your thoughts, they'll become words;
2. Control your words, they'll become actions;
3. Control your actions, they'll become habits;
4. Contrôle your habits, they'll become your character;
5. Control your character , it will become your destiny.

PS:

A destiny being a written futur, it's scripture is then enshrined in individual minds, thoughts. Egocentric thought

s have to be transformed in Ecocentric thoughts. From an autodestructive anthropocentric center to a Natural fundamental structure, the future being the inheritance of the present as the present is the baby of the past. The individual, and natural, control of a non-divided future is Naturalism.

UNIVERSAL, COSMIC AND INTERGALACTIC CONSTITUTION

(A Mother Law for the ALL LOT)

The Constitution is Ratified and Signed by any authority or organization, institution (etic, governmental, international or transnational as well as hypothetical Extra-Terrestrial authorities), to whom responsibilities is to apply, to enforce and to implement It, according to its own system (juridical, legislative, executive, cultural, traditional, etc.).

Signature of the Universal Constitution at the top of the hierarchy of the juridical norms implies the submission of national constitutions as well as organizations visions to the Law of One or Natural Law (that can be observed in Nature Itself): Interdependence of all components, systemism and all its characteristics (as: “the change of one element affects all the other elements composing the considered system”), possible Change of the external reality as well as the self itself by a free and non imposed control individual mind/brain, absence of any center, impermanence, etc.

Are submitted too to the Pyramidal Law System: any authority, anywhere, anytime, anyhow.

The individual volunteer psychic/ mental revolution is the key. Unique and ultimate solution to the multi centuries old structure threatening humankind of an imminent self destruction.

The access to Natural non manifest can be discovered, by individuals or science, at that price only: a real psychic individual revolution putting “ECO” (everything is interdependant, whatever the size of the “home”) instead of EGO (anthropocentric psychic activity based on the thoughts “I am what I think”) to replace a dying obsolete predator, conflictive, destructive, suicidal and competitive system.

Nature or Law of One as Mother Law

Article 1: The Universal Declaration of the Rights of Mother Earth of 2010 become jus cogens, compulsory Law, with constitutional value and compulsory force.

Article 2: The Charter of Earth 2000 become jus cogens, compulsory Law, with constitutional value and compulsory force.

Article 3: The Equatorian national Constitution of 2008 et the Bolivian Framework Law (071) on Mother Earth rights, are example of effective implementation of the Universal Constitution, as well as examples of effective national application and judicial compliance of national Law systems to the Universal Constitution, as well as examples of sur les droits de la Terre Mere constituent des references d’execution et de legislation mettant en application

Article 4: the Earth Jurisprudence of Thomas Berry become jus cogens, compulsory Law, with constitutional value and compulsory force.

Article 5: The word “Earth” is replaced by the word “intergalactic “ in the 4 articles above.

The 5 Articles above are founding the unbreakable Constitutionality block,
universal reference of the Universal and Intergalactic Constitution.
